OUTPUT

The screenshot displays the UsabilityHub website interface. At the top, a browser window shows the URL `127.0.0.1:5500/index.html`. The website header includes the UsabilityHub logo, navigation links for Products, Customer, Pricing, and Resources, and buttons for Sign In and Sign Up. A blue banner below the header reads "New to Usability Hub: Open and closed card sorting".

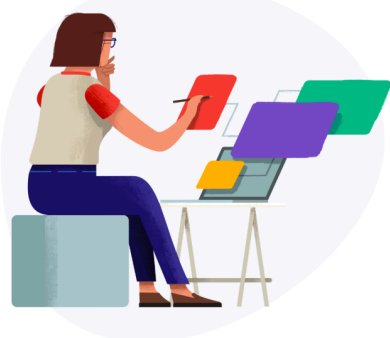

The main hero section features the heading "Design Confidently" and a subtext: "UsabilityHub is a remote user research platform that takes the guesswork out of the design decisions by validating them with real users." A "Get Started" button is positioned below the text. To the right is an illustration of three people collaborating around a laptop.

Below the hero section, a row of logos for partner companies is shown: amazon, Google, TaskRabbit, Airtable, box, GoDaddy, and asana.

The central section is titled "Your user reasearch Swiss Army knife" (note the typo in the image). It contains a grid of six research methods, each with an icon, title, description, and a "Learn more" button:

- Card sorting**: Discover how people group and label information. (Icon: teal circle with white lines)
- Prototype tests**: Discover how people navigate your Figma prototypes. (Icon: pink circle with white 'n' and arrow)
- First click tests**: Test interaction with first click and navigation tests. (Icon: purple circle with white mouse cursor)
- Design surveys**: Get feedback on images, videos or audio files. (Icon: orange circle with white question mark)
- Preference tests**: Find out which designs users prefer and why. (Icon: red circle with white heart)
- Five second tests**: Test comprehensibility by measuring first impressions. (Icon: blue circle with white hourglass)

A "See all features" button is located at the top of the feature grid.

Effortless validation

Design Professionals

Test interfaces, interaction flows, iconography and more, to help you create intuitive and delightful experiences for your users.

Optimisation for Marketers

Fine-tune landing pages, messaging, and creative, helping you optimise conversion rates on marketing campaigns and product launches.
